

KRUTIKA KAUR

Caledon ON • +1 647 922 0221 • kkrutika674@gmail.com

Education

McMaster University — Bachelor of Engineering (B.Eng)

Expected: April 2029

Engineering I

- Relevant Coursework: Integrated Cornerstone Design Projects in Engineering, Calculus 1, Mechanics, Linear Algebra

Technical Skills

Languages and Frameworks: Java, Python, SQL, HTML/CSS, Streamlit (python), Git, Matlab

Developer Tools: MS Office, Adobe Acrobat, Adobe Photoshop, AutoCAD, 3D Printing

Projects

Personal Project

April. 2026- Present

Smart Desk Companion | *Python & Embedded Systems*

- Developed a real-time data monitoring dashboard using Python and Streamlit to parse and display sensor data streams via UART communication.
- Currently designing and building an embedded system integrating environmental sensors with an STM32 microcontroller platform utilizing bare-metal programming.

McMaster University

Jan. 2026- April. 2026

Modular Assistive Utility System (Project 3) | *CAD Lead & Project Administrator*

- Co-designed a mechanical assistive device under a strict 250g weight constraint for a client with mobility limitations.
- Engineered a 115 cm telescoping rod with dual-grips, reducing finger strain by shifting load to arm movements.
- Modeled a mechanical twist-lock interface in CAD, tuning 3D-printed tolerances by 0.5mm to prevent component jamming.
- Authored technical drawings for modular attachments designed to securely capture and lift 200g objects.
- Managed a 5-member team timeline using Gantt charts to hit 100% of academic and design milestones.

Experience

ABC Access Business College

Jun. 2025- Aug. 2025

Administrative Intern | *Python & Leadership*

- Built a Python program to track student enrollment, automating data extraction and generating summary CSV reports that cut administrative processing time by 50%.
- Cleaned and validated student information using Python functions to detect duplicates, missing fields, and formatting issues, improving data accuracy by ~35%.
- Worked with the CRM system to enter data, correct errors, and maintain accurate, up-to-date student records.
- Updated student documents and supported daily administrative tasks while developing practical skills in data management and automation.
- Participated in weekly team meetings to provide speeches to prospective student groups.
